WASP COUNTIT

If you use QuickBooks® or Excel® to keep track of your inventory and a paper-based inventory counting process, you'll be frustrated with the slow and time consuming process of physically counting your inventory. Illegible hand writing and errors of re-keying information into QuickBooks will result in wasted time and money.

Now with Wasp® CountIt™ you can use an "electronic form" of your inventory and quickly and accurately verify inventory counts. CountIt provides everything you need (portable data terminal with an integrated barcode scanner, software and integration with QuickBooks) to significantly reduce the time it takes to count and accurately maintain your inventory counts.

PC SYSTEM REQUIREMENTS

- ▶ Windows 2000, XP, 2003 Server
- ▶ 200MHz or higher processor
- ▶ 128 MB RAM minimum
- ▶ 350 MB disk space minimum
- ▶ 256 color minimum
- ▶ CD-ROM drive (Installation only)

HOW WILL COUNTIT HELP?

Data import and export wizard - Data import wizard walks you through the process of collecting data from the inventory application like QuickBooks® or Excel®.

Easy Interface - Wasp CountIt™ provides an intuitive interface that allows you to see any items that were counted, uncounted, discrepancies, double counted, and more!

You're in charge - Accept or reject any individual item count and update only information that you deem as accurate.

Don't throw the baby out with the bath water - Leverage your familiarity with QuickBooks® or Excel® while adding the accuracy and speed of barcode scanning devices for physical inventory counts.

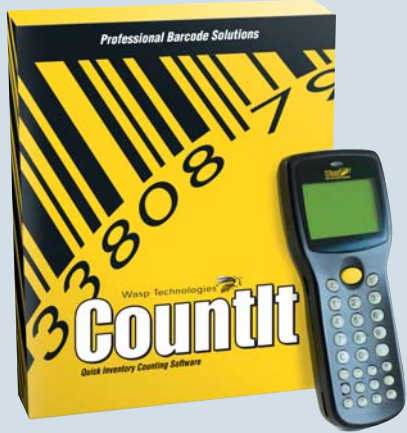

- Import any text file, .csv file, QuickBooks® file, or Excel® file
- Count the items in moments & know what you have on-hand
- Quick reporting function shows all inventory issues and data

Inventory not barcoded? Just add Wasp Labeler to your solution to connect to your existing database and print fully personalized inventory labels in seconds.

NEW FEATURES IN COUNTIT v2

- ▶ Wasp CountIt v2 has intuitive and fresh XP styled user interface overhaul
- ▶ We added Quickbooks UK and Canadian support in addition to the QuickBooks US connection.
- ▶ Improved out of box experience. WDT2200 will be auto-detected by CountIt at factory default settings and we added features to allow user to change the device setting directly from CountIt.
- ▶ Replaced HTML reports with our versatile data grids, so user can build their own custom reports and save or print at ease.
- ▶ CountIt now offers user the ability to print item and location labels, either to our WPL 330 thermal printer or any printers using the Avery 5160 label template
- ▶ CountIt offers more options for downloading Quickbooks items. Now user can also download non-inventory items to the WDT2200 and count inventory.
- ▶ With the inclusion of new Quickbooks SDK, CountIt v2 will support virtually all versions and editions of Quickbooks from 2002 to 2007.

HOW COUNTIT WORKS

Wasp CountIt is a simple solution that solves the age old time consuming task of counting inventory:

- 1) Collects inventory data from other applications like QuickBooks and Excel,
- 2) Sends this inventory data to the Wasp WDT2200 portable barcode scanning device (which you use to automate physical inventory by scanning barcodes and entering quantities on-hand),
- 3) Accepts the physical inventory data back from the Wasp WDT2200 portable barcode scanning device and shows you any variances for your review and acceptance, and
- 4) Sends this accurate inventory level back to QuickBooks or Excel.

Turn your 2-day inventory into a 2-hour count with Wasp CountIt!
Faster and easier inventory counts means more inventory counts and more control.

COUNTIT USES

- ▶ Retail inventory reconciliation and counts
- ▶ Manufacturing or warehouse physical inventory counting
- ▶ Daily, weekly, monthly and year end inventory count verification
