

duraSign Pad 10.0

Information about the signature pad

10 inch signature pad with color screen, document view & tempered glass surface for maximum durability.

Highlights

Document view: This signature pad allows you to display the document to be signed. You can sign directly in the document at the appropriate place. The signature is displayed in real time on the color screen of the signature pad, almost like on paper.

Large color screen: The 10" color display with high resolution displays an A4 page in original width and gives you enough space to insert long texts, messages and interactive buttons. Even vertical & horizontal scrolling, zooming and scrolling is easily possible with the stylus.

Maximum durability: The elegant and robust design with 3 mm thick polycarbonate ABS housing and large tempered glass surface in the writing area, makes this signature pad a both wear-resistant and good-looking solution for stationary use.

duraSign Pad 10.0

Information about the signature pad

Highest security: The biometric data of your signature (pressure, speed and writing direction) is already securely encrypted in the pad and always securely transmitted. The StepOver software solutions bring this signature into the document. The connection is asymmetrically encrypted with an RSA 4096 key. The validity of the signature and the document integrity can be checked with freely available software (e.g. Acrobat Reader). To prevent theft, the duraSign Pad 10.0 can be secured using a Kensington Lock or attached with a VESA Mount 100.

eIDAS compliant: This StepOver Signature Pad is suitable for setting up a system for simple and advanced electronic signatures in accordance with eIDAS.

Software recommendation

The duraSign Pad 10.0 is complemented by special signature software, which is available separately. For your legally binding and authentic electronic signature, we recommend:

eSignatureOffice:

The fully automatable offline signature solution.

webSignatureOffice:

The web-based online signature solution with special freedoms.

Signature API:

The comprehensive API for e-signature integration
