

duraSign Pad 5.0

Information about the signature pad

The new 5 inch signature pad with color screen, document view & tempered glass surface - the successor of the duraSign Pad Brilliance

Highlights

Maximum durability: The combination of a robust polycarbonate ABS housing (3 mm) and a tempered glass surface make this pad **a particularly durable and resistant signature pad** – ideal for permanent use at reception desks, cash registers, counters and in offices.

High resolution color screen: The **5-inch color display** (800 × 480 pixels) with 64,000 colors provides space for displaying text and interactive buttons. In standby mode, you can present your latest offers, products, and solutions in a **slide show for advertising purposes**.

Document view: This signature pad allows you to display the document to be signed. You can **sign directly in the document** at the appropriate place. The signature is displayed in real time on the color screen of the signature pad.

duraSign Pad 5.0

Information about the signature pad

Highest security: The biometric data of your signature (pressure, speed and writing direction) is already **securely encrypted in the pad** and is always securely transmitted. The StepOver software solutions bring this signature into the document. The biometric data is asymmetrically encrypted with an **RSA 4096 key**. The validity of the signature and the document integrity can be checked with freely available software (e.g. Acrobat Reader). To prevent theft, the duraSign Pad 5.0 can be secured using a **Kensington Lock**.

Compatibility with previous model: The duraSign Pad 5.0 is the direct **successor to the duraSign Pad Brilliance** and is fully compatible. If you have been using the Brilliance Pad, you can easily switch to the duraSign Pad 5.0 – without any software updates or system adjustments.

eIDAS compliant: This StepOver Signature Pad is suitable for setting up a system for simple and **advanced electronic signatures** in accordance with eIDAS.

Software recommendation

The duraSign Pad 5.0 is complemented by special signature software, which is available separately. For your legally binding and authentic electronic signature, we recommend:

eSignatureOffice:

The fully automatable offline signature solution.

webSignatureOffice:

The web-based online signature solution with special freedoms.

Signature API:

The comprehensive API for e-signature integration
